### Auditor's Responsibility

3. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in India. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.
4. An audit involves performing procedure to obtain, on a test basis, audit evidence supporting the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement including the assessment of the risk of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedure that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and reasonability of accounting estimates made by the management as well as evaluating the overall presentation of financial statements.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.
6. It is the policy of the organisation to maintain its accounts and prepare its financial statement on cash receipts and disbursement basis. On this basis revenue and related assets are recognised when actually received rather than when earned and expenses are recognised when paid rather than when the obligation is incurred.
